The new Škoda Octavia

There is still plenty to explore

There's still plenty to explore

Every road you take in your life leads to new discoveries. Explore the next one with the new and improved Škoda Octavia. Enjoy the new tech that will enable you to work and live smarter.

The new Octavia is about more than just a smarter look. The new materials used in the interior are more pleasant to the touch and easier on the environment. Improvements such as Ergo Seats bring a new level of comfort even on the longest drives.

On the technological side of things, the interior is dominated by a pair of new and larger screens – 10" Virtual Cockpit and 10" Škoda Infotainment. These give you a perfect overview of the new features the Octavia has to offer.

That's the smart way of working and living. That's what we call Škoda.

A new look for every day

Whether it's workday or a holiday, it always feels good to stand out in the crowd. We made the new Škoda Octavia look, feel and function even smarter. Look great while searching for your next adventure!

**Classic with
a sharp edge**

Spacious in style

The distinctive light signature of the LED headlights and wide, imposing grille give the updated Octavia a new, characteristic look. At the same time, it retains its classic shape and legendary practicality, including the largest

luggage space in class. Once again, the Octavia shows that you actually can have it all – great looks, effective aerodynamics and lots of practicality.

A crystalline signature on a timeless shape. The new Octavia retains all the sleekness, space and practicality it is known for and adds a crisper style,

LED Matrix beam headlights

Crystal clear view with a Crystallinium style. LED Matrix beam headlights provide great visibility even with other cars around and now, with 36 LED segments instead of 24, they offer even finer precision. The coloured crystalline element accentuates the sharp contours of the headlights, adding a touch of elegance and visual appeal.

LED rear lights with animated indicators

With crystalline elements inside, the LED rear lights with animated indicators create an unmistakable and easy-to-recognize visual signature. This look is underscored by the use of full LED technology and the dynamic turn signals, which illuminate sequentially in the direction you are turning.

Virtual pedal

Full hands are not a problem anymore. With Virtual Pedal, just a swing of the foot under the bumper is enough to open the door.

Walk-away KESSY

Never forget to lock your car ever again. With the new walkaway function, the Keyless Entry Start and Exit System will not only lock and unlock your car with a touch of the front door handles, but will also automatically lock the doors when you walk away with the key.

Luggage room

The best-in-class luggage compartment with a volume up to 1,550 liters.

Enhanced space

Still as spacious and now also even more modern and luxurious. New, larger screens open up window into the digital world.

This is about you and your passengers. Settle yourself in comfortable seats, grab the perforated leather multifunction steering wheel, and place your feet on the pedals.

The 10" Virtual cockpit will serve you all the necessary information, while the KESSY Advanced will make entering your driving world easy. This is all about the drive.

**All the information,
as you need it.**

See what you need when you need it. Using the 10" Virtual Cockpit and 10" Škoda Infotainment, the new Octavia keeps you in the picture.

Infotainment screen

The world at your fingertips. With a 10" touchscreen, the new Škoda Infotainment offers an even clearer way of displaying all the information and entertainment features. The new generation of the MIB system is not only smoother and faster in operation, but also offers new functions, like the Heaters button that makes it easy to activate all or selected heated features – front/rear windscreens and seats – by just one tap.

Virtual Cockpit

All the key information right in front of you. The 10" Virtual Cockpit offers driving data in easy-to-comprehend, customisable view.

Ambient lighting

Adjust the style of your car's interior to your current mood. The ambient lighting on the dashboard, front doors and leg room area can be set to a colour of your choice out of a wide range of options, instantly changing the overall atmosphere.

Ergo seats

Comfort even on the longest drives. With 4-way lumbar support, and Advanced massage functions, the Ergo seats were designed with the health of your back in mind. Tested by the German AGR (Healthy Back Campaign) organisation. With heating and ventilation for even greater comfort.

Smart storage for smart things

Even in today's digital world, we need a lot of physical things to carry around. Smartphones that need to be charged. Gloves, glasses and bags that need to be stowed away. Something to eat and something to drink. In the new Octavia, everything you might need is always on hand.

Always charged

The new 15W phone box enables fast charging of your smartphone, while active ventilation prevents it from overheating.

Jumbo box

Have everything you need on hand. Jumbo box hidden in the armrest offers ample space to store everything you might need during your day on the road.

Umbrella

The traditional smart features of Škoda cars now come in a more sustainable form. The umbrella, which can be hidden in either front doors, is now made from ecofriendly materials with ecological impregnation.

Always connected

The infotainment screen is not just larger than ever before. It also offers access to even more features, like the set-up for improved ambient lighting, in a brand-new, smooth virtual environment. Explore the world in a digital way.

Take the online world with you

Stay connected wherever you are. Being fully and permanently online means always having access to entertainment, information, and possible assistance while on the move.

Sportline

Sporty look for any day

It doesn't matter where you go, if you can enjoy it in style. The new Octavia Sportline combines a more dynamic-looking exterior with sharper driving dynamics and more tech. Make the most of every road you take!

Dynamic looks, dynamic drive

Enjoy the drive and look the part. The Octavia Sportline catches the attention with its front aerodynamic spoiler and rear diffuser, gloss black grille and trim, as well as exclusive alloy wheels and LED headlights.

The drive is better, too. It comes equipped with the Performance Package, which includes progressive steering and lowered sports suspension.

Your space to drive

The Octavia Sportline takes all the practicality and moves it to a new, sportier level. Sports seats in a combination of quilted fabric and artificial leather, carbon look décor and artificial leather pad and door inserts. And ambient lighting in a colour of your choice out of a wide range of options.

Focused on the driver

The multifunctional sports steering wheel is upholstered with perforated leather for even better grip and Sportline badge for added style. The standard 10" Virtual Cockpit can be switched into sports mode.

Sports seats

The Sportline seats will catch your attention with their quilted fabric and black artificial leather upholstery. Supportive for dynamic driving, comfortable on daily commute.

Loft interior
